RE: Unmanifested Waste Report

Dear Mr. Greenlaw:

This letter is being written to document our recent conversation regarding a waste disposal action involving oil based paint. The paint in question was manifested from our Charles Wood facility (USEPA ID # NJ2210020978) located in Tinton Falls, New Jersey. In accordance with 40 CFR Part 261, the waste paint was classified as an ignitable waste as defined by 40 CFR Part 261.21. On December 18, 1997, one 55 gallon drum of consolidated paint waste was manifested (NJ manifest # NJA2824339) to Advanced Environmental Technical Services' (AETS) Treatment, Storage and Disposal Facility located in Flanders, New Jersey. At the generator's request, AETS redirected the drum to the Chemical Waste Management (CWM) Resource Recovery facility located in West Carrollton, Ohio. Once received at the CWM facility, the paint waste was to be fuel blended as part of its final treatment remedy.

On January 28, 1998, I received a phone call from an AETS representative and at said time was informed that PCBs were identified in the drum of paint waste above 50 parts per million (ppm). I instructed AETS to have the drum reshipped to their Flanders facility and from there to redirect the drum to the CWM facility located in Port Arthur, Texas. The Port Arthur facility includes a TSCA permitted incinerator. The drum was shipped from the Flanders facility on March 3, 1998 and arrived at the Port Arthur facility on March 6, 1998. The shipment of the drum to the Port Arthur facility was documented on a Texas hazardous waste manifest (# 01094646). Following the incineration of said waste, I will receive a certificate of destruction from CWM. The drum will be referenced in our 1997 Annual PCB Document Log which will remain on file in Building 173.

Currently, I'm in the process of formally modifying our BASOPS support contract so that all paint related waste streams are sampled and tested for PCB content before such wastes are manifested for proper disposal. This management practice will prevent paints which contain PCBs at levels equal to or greater than 50 ppm from being shipped to a Non-TSCA facility.

Should you require any additional information regarding this subject or any other environmental issue at Fort Monmouth, please feel free to give me a call. I can be reached at (732)-532-6223.

Sincerely,

Joseph M. Fallon, CHMM
Environmental Protection Specialist

Re: Unmanifested Waste Report

Dear Mr. Greenlaw:

This report is being provided in accordance with 40 CFR 761.211 for an unmanifested shipment of TSCA waste received at the following facility:

Advanced Environmental Technical Services (AETS)
1 Eden Lane, Flanders, NJ 07836
NJD980536593

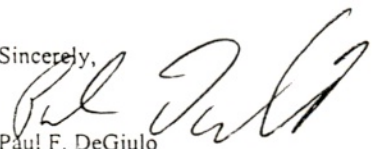

AETS operates a TSCA permitted facility for the commercial storage and consolidation of PCB wastes. In addition the facility is permitted by the NJDEP for the storage of hazardous wastes. Prior to acceptance, all wastes are certified by the generator as being properly characterized according to their hazards and classified in compliance with all applicable regulations. In accordance with the AETS facility waste analysis plan, all wastes upon receipt are evaluated for conformance with the certified waste profile. Following load consolidation at the AETS facility the wastes are then manifested off-site to an appropriate treatment or disposal facility with AETS as the generator. Upon receipt of the shipment at the destination disposal facility the waste is then analyzed in accordance with that site's waste analysis plan to determine if the waste is conforming.

As a result of a recent shipment AETS has been notified that certain wastes were non-conforming due to the presence of PCBs. Since it has been determined that AETS had originally received an unmanifested PCB shipment from the initial generator AETS is now submitting this report to the USEPA. The attached report details the specifics of the unmanifested PCB waste.

Under civil and criminal penalties of law for the making or submission of false or fraudulent statements or representations (18 U.S.C. 1001 and 15 U.S.C. 2615), I certify that the information contained or accompanying this document is true, accurate, and complete. As to the identified section(s) of this document for which I can not personally verify truth and accuracy, I certify as the company official having supervisory responsibility for the persons who, acting under my direct instructions, made the verification that this information is true, accurate, and complete.

Should you have any questions or need additional information please contact me at (201) 691-3930.

Sincerely,

Paul F. DeGiulo
Environmental, Health, and Safety Manager

pc. Joseph M. Fallon, US Army Elect Comd

TSCA Unmanifested Waste Report

Commercial TSCA Facility:

Advanced Environmental Technical Services (NJD980536593)
1 Eden Lane, Flanders, NJ 07836

Generator Information:

Name: US Army Elect Comd
Address: C Wood Area, J Fallon. Fort Monmouth, NJ 07703
EPA ID #: NJ2210020978

Transporter Information:

Name: AETS
EPA ID #: NJD080631369

Shipping Information:

Manifest Number - NJA2824339
Container Number - PF 30022 007
Date Received - 12/23/97

Waste Description:

Type: Oil based paint
Quantity: One 55 gallon drum.
PCB Concentration: 214 ppm

Explanation for Unmanifested PCBs:

Generator was unaware that PCBs were present in the wastestream.

Disposition of the Unmanifested PCBs: Drum is currently in storage at AETS Flanders pending shipment to Chemical Waste Management, Inc., Port Arthur Texas, for incineration.
